Reduce lost time injuries caused by slips & falls ...

... when working on ice and snow.

More than 25% of all injuries sustained across all industries (about 42,000 workers in Canada) are caused by slips, trips and falls. This number represents about 18% of the time-loss injuries that were accepted by workers' compensation boards across Canada. 67% of falls involved falls on the ground level. Workers who work outside or both inside and outside need PPE that prevents slips and falls on ice and snow.

The Dentec IceTred™ was designed to not only prevent expensive falls outside on ice and snow, but also be flexible enough to wear inside as well by simply rotating the cleats on the worker's footwear. [Click here to see the features of the IceTred™.](#)

Introducing A New Breed Of Eye/ Face Protection ...

Considerations when deciding on which eye/face protection to use, you should consider the following:

Do you need anti-scratch, anti-UV, anti-fog and/or anti-static, polarized lenses?

How important is lightweight when wearing protective eyewear?

What certifications are required?

Soft nosepiece or hard, adjustable or not?

Frame colours available.

Non-slip temple arms.

Coloured lenses, indoor/outdoor.

Style.

To be worn with respiratory protection?

Available with magnifiers for reading.

Durability.

Foam collar availability.

Size adjustability for both men and women.

Price.

Comfort-Air N95 Reusable Respirator Solution – Replaces Disposable Respirators!

One of the overwhelming successes we have experienced during this pandemic is the incredible response we received for our N95 filters that can be mounted to any of our reusable half masks. This solution allows the user to replace disposable respirators completely!

Our solution will:

- Provide greater user comfort than any disposable respirator.
- Superior Protection: All of our reusable half masks can be fit checked each time to don the mask and go to work.
- Believe it or not – using our reusable N95 respirator solution can deliver savings because the filter cover protects the N95 filter pad increasing the usable life span of the filter.
- Great comfort, better protection and less expensive... an unbeatable combination.
