

The Spread Stops HERE! Protecting Those That Protect Us

The NEW Comfort-Air[®]NxMD N95 NIOSH APPROVED Reusable Respirator WITHOUT an exhalation valve has proven a 95% in Waste Reduction and a 90% Reduction in Costs spent VS disposable respirators!

Safer!

Air-tight seal. Safer than disposables N95's, with two-way filtration in and out. Suitable for COVID virus in accordance with CDC guidelines and non-oil based aerosols. Health Canada advises to use a respirator **WITHOUT** an exhalation valve.

Unique Design

Low profile facepiece occupies less of the face while providing greater comfort. Compact shape and cartridges increases visibility and does not interfere with medical equipment. Cartridges can be adjusted into 3 different positions. Fits under face shields & will not fog glasses.

Less Waste, Less Cost!

Reduced filter replacement - less waste. Reduces consumption costs dramatically. Environmental savings of 6,673lbs of waste diverted a year

Enhanced Comfort

"In terms of comfort, the fit is much gentler on your face, more comfortable and just miles ahead of any disposable option I've tried. As healthcare workers, we all know too well the harsh effects of wearing masks for long periods of time, but with the Comfort-Air[®]NxMD, face rashes/ acne are no longer a constant issue for our staff." -Dr. O'Toole

More Affordable

The N95 and P100 filter housing can be disinfected and therefore the filter can be reused up to a year. Significant cost savings and increased sustainability.

NIOSH & Health Canada Approved

N95 or P100 filters.
