

Textured "No-Slip" Face Seal & Large, Flexible Rolled Sealing Edge
-Provides exceptional comfort & superior fit.

Unique Low Fitting Mask
-Provides ample room for eyewear.

Low "Dead Air" Space
-Improves worker comfort from less re-breathing of exhaled air.

COMFORT AIR[®]

**HALF FACEPIECE
KEY SELLING POINTS**

Extra Large Inhalation Valves
-Lower inhalation resistance & contributes to easier breathing.

Multi-Position Cartridge Attachment
-#1 position is "sweptback" for maximum visibility.
#2 & #3 change the cartridge positions for use under various PPE such as welding helmets & faceshields.

Deep Chin Cup
-Gives a more secure universal fit.

Unique Corrugated Exhalation Valve Diaphragm
-Only available on Dentec Safety's half-mask, this large diameter valve opens quickly and allows maximum exhalation of hot, humid air from the mask. Heat build-up is reduced and wearer comfort increased.

SERIES 100 SILICONE

SERIES 400 ELASTOMERIC

Molded from pure silicone. Comfortable & easy to clean. Textured "no-slip" face seal & large flexible sealing edge. Multi-position cartridge attachment. Extra large inhalation valves & unique corrugated exhalation valve diaphragm moves more hot air out of the facepiece, increasing user comfort & performance.

Molded from elastomeric rubber. Flexible sealing edge. Multi-position cartridge attachment. Extra large inhalation valves & unique corrugated exhalation valve diaphragm. GREAT VALUE.
