

# ICETRED™ TRACTION DEVICES

Winter ICETRED™ Traction Devices offer a truly **ECONOMICAL SOLUTION** to a very real **SAFETY** concern.

## HTD-Heel Traction Devices

### Walk on Ice or Snow With Confidence

#### Tough & Durable Design

Made of durable natural rubber that is incredibly tough but maintains its flexibility in extreme temperatures. Incredible traction on ice but also when transitioning to asphalt and concrete. Patent Pending Design.

#### Tiny Solutions BIG Grip!

Five strategically positioned tungsten carbide spikes provide excellent ice traction performance while maintaining comfort under foot. Wears longer and holds its ice piercing edge better than steel spikes or screw heads. Becomes sharper with greater wear. Spark resistant. Used on all ICETRED™ Traction Devices. Rubber Traction studs provide excellent traction on snow.

#### Adjustable & Easy To Use

Velcro strap allows the HTD to be easily secured to any footwear regardless of size. Unique heel pad shape forms more naturally to any footwear to ensure maximum spike contact.

#### Universal Size

Unique rubber formulation provides more stretch to ensure a tight and secure fit to the footwear regardless of size or type.
