# Stay Safe This SEASON

August is typically the peak month of wildfire season across western Canada and in eastern and western US states like California, Georgia, Texas, North Carolina, Florida, Arizona and Oklahoma which have become increasingly dry and hot making them more susceptible. However, due to climate change and environmental factors, wildfire season is lasting longer, becoming more intense and requiring more efforts and resources to control.

Whether you live near a high-risk zone, are part of wildland fire services, or work/ participate in wildfire clean-up, effective personal protective equipment is critical to have on hand to ensure you/ your employee's safety and reduce risk of injury or serious illness.

RESPIRATORY  
PROTECTION

## RESPIRATORS

## Comfort-Air® 100, 300, 400 Series Reusable Respirators

Superior Protection, Seriously Comfortable, Environmentally Sustainable

COMFORT  
AIR

Smoke from wildfires contains chemicals, gases, and fine particles that can harm health. The greatest hazard comes from breathing fine particles, which can reduce lung function, worsen asthma and other existing heart and lung conditions, and cause coughing, wheezing and difficulty breathing, according to Cal/OSHA.

If you decide to use respirators against the hazards of ash particles and soot left over from a wildland fire a National Institute for Occupational Safety and Health (NIOSH) certified particulate respirator, such as an N95, N99, N100, R95, P95 & P100 respirator in either a [disposable](#) or [reusable respirators](#) style can be used to help reduce the user's exposure to these particles.

400NXN95

**COMFORT**®   
**AIR Nx**

## Comfort-Air®Nx Reusable N95 & P100 Respirators

One of the overwhelming successes we have experienced during this pandemic is the response we received for our N95 filters that can be mounted to any of our reusable half masks. This solution allows the user to replace disposable respirators completely!

400NXP100

With two-way filtration when breathing in and out, the Comfort-Air®Nx, an elastomeric NIOSH approved respirator WITHOUT an exhalation valve, provides better fit and an air-tight seal for all face shapes and sizes. The N95 and P100 filters can be disinfected, are reusable for one year (use dependent), contributing to 95% waste reduction and 90% cost savings versus disposable respirators.

## COMFORT-AIR SERIES 100 HALF MASK

	Part No.	DESCRIPTION
	100-S-00	100 Silicone Rubber Facepiece Assembly, Small
	100-M-00	100 Silicone Rubber Facepiece Assembly, Medium
	100-L-00	100 Silicone Rubber Facepiece Assembly, Large

## COMFORT-AIR SERIES 300 HALF MASK

	Part No.	DESCRIPTION
	300-SM-00	300 Thermoplastic Rubber Facepiece Assembly, Small/Medium
	300-ML-00	300 Thermoplastic Rubber Facepiece Assembly, Medium/Large

## COMFORT-AIR SERIES 400 HALF MASK

	Part No.	DESCRIPTION
	400-SM-00	400 Elastomeric Low Maintenance Facepiece Assembly, Small/Medium
	400-ML-00	400 Elastomeric Low Maintenance Facepiece Assembly, Medium/Large

## COMFORT-AIR SERIES 130M FULL FACEPIECE

	Part No.	DESCRIPTION
	130M-0-00	130M Special Compression Silicone Full Facepiece With Neckstrap And Drawstring Nylon Storage Bag

## FILTERS, CARTRIDGES, COMBINATION CARTRIDGES & DISPOSABLE RESPIRATORS & LENS COVER

## Foam-lined Eyewear

Safety glasses are one of the most common types of PPE, but if participating in any outdoor work in windswept conditions, or dusty, dirty and smoky environments similar to the elements in wildfire zones, you should consider upgrading your eye & face protection to foam lined eyewear like the [SandViper™](#), [DustDevil™](#), [SentecDX™](#) and [CeeTecDX™](#)

DustDevil™

Sentec™DX

Ceetec™DX

SandViper™

### Design Features:

Vented EVA Foam  
Prevents eye injuries from wind, dust and debris. Hypo-allergenic.

Fog-Free System  
Clear Vision and durability with anti-fog, scratch-resistant lens coating.

Impact Protection  
Prescription Insert Accessory
