

SPECIALIZING IN SAFETY SOLUTIONS

RESPIRATORY PROTECTION

HALF FACEPIECE KEY SELLING POINTS

Textured “No-Slip” Face Seal & Large, Flexible Rolled Sealing Edge

-Provides exceptional comfort & superior fit.

Unique Low Fitting Mask

-Provides ample room for eyewear.

Low “Dead Air” Space

-Improves worker comfort from less re-breathing of exhaled air.

Multi-Position Cartridge Attachment

-#1 position is “sweptback” for maximum visibility. #2 & #3 change the cartridge positions for use under various PPE such as welding helmets & faceshields.

Extra Large Inhalation Valves

-Lower inhalation resistance & contributes to easier breathing.

Deep Chin Cup

-Gives a more secure universal fit.

Unique Corrugated Exhalation Valve Diaphragm

-Only available on Dents Safety's half-mask, this large diameter valve opens quickly and allows maximum exhalation of hot, humid air from the mask. Heat build-up is reduced and wearer comfort increased.

COMFORT[®] AIR HALF MASK

100 Silicone

- Molded from pure silicone material with no extra additives provides incredible comfort and superior fitting capabilities.
- Simple and quick to clean, particularly in paint spray applications.
- Rugged durability provides long service life.
- Available in 3 sizes: small, medium, and large.

Extra Large Sealing Surface

- Covers a larger area of the face.
 - Flat surface provides a greater probability of fit on a wider variety of facial features.
 - Do not have to tighten the straps down too tight, allowing for a more comfortable fit.
 - Ultra soft nose bridge area conforms to most all sizes and shapes reducing pressure point at a key fitting area.
- Extra large chin cup fits a wide variety of facial features more comfortably.
 - Enhanced Textured “non-slip” face seal provides exceptional comfort. Prevents the mask from moving on the face maintaining a proper fit during use. Not available from any competitive mask.

300 Thermoplastic

- Has all the advanced features of the Series 100 Silicone mask, but is molded from a custom-engineered thermoplastic blend that provides economy with function.
- Provides excellent comfort, superior fitting capabilities and is very rugged.
- Available in 2 sizes: small/medium, and medium/large.

400 Elastomeric

- Low Maintenance/Limited Use.
- The Series 400 is priced to be disposable, but can easily be used over & over.
- Same features as the series 100 & 300 face masks except a different material and more economical suspension assembly.
- The elastomeric rubber offers excellent comfort, superior fitting capabilities and is very rugged.
- Available in 2 sizes: small/medium, and medium/large.

N95 REUSABLE RESPIRATOR SOLUTION REPLACES DISPOSABLE RESPIRATORS!

One of the overwhelming successes we have experienced during the COVID-19 pandemic is the response received for our N95 filters which can be mounted to any of our reusable half & fullface masks. This solution allows the user to replace disposable respirators completely!

Our solution will:

- Provide greater user comfort than any disposable respirator. Lower breathing resistance and less heat build up inside the mask ensures greater comfort and productivity.
- Superior Protection: All of our reusable half masks can be fit checked each time you don the mask and go to work. It is very difficult to conduct a negative or positive pressure seal check with any disposable respirator.
- Ensure your employees are protected each and every time they put on their respirator. Critically important for those dealing with OSHA's new silica dust standard and protection against various types of COVID viruses.
- Believe it or not – using our reusable N95 respirator solution can delivery savings because of our unique filter holder and cover. This allows the user to mount our N95 filter to any of our half or full-face masks. The filter cover protects the N95 filter pad increasing the usable life span of the filter.
- All our half masks, parts, cartridges and filters are manufactured and assembled in our facility in Lenexa, Kansas.
- Great comfort, better protection, less expensive and made in America... an unbeatable combination!

COMFORT[®] AIR N95

STEP 1 - SELECT YOUR MASK

SERIES 100 Silicone Rubber

Molded from pure silicone. Comfortable & easy to clean. Textured “no-slip” face seal & large flexible sealing edge. Multi-position cartridge attachment. Extra large inhalation valves & unique corrugated exhalation valve diaphragm moves more hot air out of the facepiece, increasing user comfort & performance.

Packaged 1 Respirator Assembly per box - 24 per case

*Includes mask, one pair of N95 filters
with filter holder & cover*

Series 100 N95 Complete Assembly N95 - Suitable for Welding, Dusts, Non-Oil Mists	
1-S-DN5	Small
1-M-DN5	Medium
1-L-DN5	Large

Silicone Rubber Facepiece Assembly	
1-S-00	Small
1-M-00	Medium
1-L-00	Large

SERIES 300 Thermoplastic Rubber

Molded from thermoplastic rubber. Provides excellent comfort & durability. Only 9 replacement parts. Flexible sealing edge. Multi-position cartridge attachment. Extra large inhalation valves & unique corrugated exhalation valve diaphragm moves more hot air out of the mask more easily.

Packaged 1 Respirator Assembly per box - 24 per case

*Includes mask, one pair of N95 filters
with filter holder & cover*

Series 300 N95 Complete Assembly N95 - Suitable for Welding, Dusts, Non-Oil Mists	
3-SM-DN5	Small / Medium
3-ML-DN5	Medium / Large

Thermoplastic Rubber Facepiece Assembly	
3-SM-00	Small / Medium
3-ML-00	Medium / Large

STEP 1 - SELECT YOUR MASK *continued*

SERIES 400 Elastomeric Rubber

Molded from elastomeric rubber. Flexible sealing edge. Multi-position cartridge attachment. Extra large inhalation valves & unique corrugated exhalation valve diaphragm. GREAT VALUE.

Packaged 1 Respirator Assembly per box - 24 per case

Series 400 N95 Complete Assembly
N95 - Suitable for Welding, Dusts, Non-Oil Mists

4-SM-DN5	Small / Medium
4-ML-DN5	Medium / Large

*Includes mask, one pair of N95 filters
with filter holder & cover*

Elastomeric Rubber Facepiece Assembly

4-SM-00	Small / Medium
4-ML-00	Medium / Large

SERIES 130M Special Compression Silicone

Special compression silicone provides exceptional comfort. Soft, pliable, yet durable. Easy to clean, particularly in paint spray applications. Available with an inner mask only, improves comfort and reduces fogging on the inside of facepiece. Universal Size - one size fits most.

Packaged 1 Respirator Assembly per box - 20 per case

Filters & Filter Pad Assembly
sold separately from
130M Respirator

130M Full Facepiece Assembly

130-M-00	Universal Size
----------	----------------

Includes Neckstrap & Drawstring Nylon Storage Bag

COMFORT[®] AIR N95

STEP 2 - SELECT YOUR FILTER TYPE & PACK SIZE

N95 FILTERS

Dentec Safety filter pads are a unique combination of electrostatic and mechanical layers of material, designed for less clogging and extended life in real-world applications. NIOSH approved as an N95 filters. CDC recommended to protect against COVID-19 viruses for healthcare applications. For industrial applications, suitable for: welding, dusts and certain non-oil based aerosols.

N95 Filter Pad - Suitable For Most Non-oil Aerosols	
158-D-N5	Box of 16
158-D-N5B100	5 Bags of 20, 100 per case
158-D-N5B1000	50 Bags of 20, 1000 per case
158-D-N5HAM	6 per Bag, Box of 6 Bags

STEP 3 - SELECT REPLACEMENT COVER & HOLDER (WHEN NEEDED)

Filter Holder For Particulate Pads	
14880	Package of 6
14880B350	Bulk Pack - 350/Box

Filter Cover For Particulate Pads	
159-T-61	Package of 6
159T61B350	Bulk Pack - 350/Box

Particulate Pad Filter Assembly	
158-T-50	Package of 4 Assemblies - 4 Filter Covers / 4 Filter Holders

130M FULL FACEPIECE KEY SELLING POINTS

Universal Fit

-One size that fits most users. Provides a balanced low-pressure positive seal.

Quick Release Shielded Buckles

-Allows fast easy removal.

5 Point Head Harness

-Provides an even, comfortable fit with no slippage.

Optional Prescription Lens Insert

(44mm & 50mm eyesizes.)
-Convenient with quick installation.

Inner Mask

-Reduces CO₂ build-up.

Anti-Fog Hard Coated Lens

-Simplifies maintenance & extends product life. Provides optically correct wide angle viewing and is easily replaced.

SPECIAL COMPRESSION SILICONE

-Provides exceptional comfort.

Metal Speech Diaphragm

-Enables clear, high quality communications.

APPROVED
NIOSH
✓
CERTIFIED

COMFORT[®] AIR FULL FACE MASK

130M Special Compression Silicone Full Facepiece Respirator with Neckstrap & Drawstring Nylon Storage Bag

Special compression silicone provides exceptional comfort. Soft, pliable, yet durable. Easy to clean, particularly in paint spray applications. Available with an inner mask only, improves comfort and reduces fogging on the inside of facepiece.

1307096

130M Protective Lens Cover

(used for Full Facepiece 130M cartridge & 131M air supplied style)

Made from from .0075" thick PETG sheet. Protects polycarbonate lens from scratches and dirt. Mounts to the mask without any adhesive. Sold in packs of 25.

16157 Prescription Lens Mount

Full Facepiece Respirator Prescription Lens Mount. Ideal for those individuals requiring prescription eyewear. Mounts easily into most full face respirator styles.

AIR SUPPLIED

Series 152 & 97LP Half Face Respirators

Designed to give the maximum seal and large exhalation valves to reduce breathing resistance. The 152's airflow control valve regulates to the wearers needs. The 97LP is designed to be used with a low pressure air source.

Series 131M

Series 131M Special Compression Silicone Full Face Respirators

Designed to give the maximum seal. Utilizes a constant flow at a low pressure. 5-point strap and extra wide sealing edge gives the wearer a superb fit. Comes with a removable inner mask and metal speech diaphragm.

1307096

131M Protective Lens Cover

(used for Full Facepiece 130M cartridge & 131M air supplied style)

Protects polycarbonate lens from scratches and dirt. Mounts to the mask without any adhesive. Sold in packs of 25.

COMFORT[®] AIR CARTRIDGE DESIGN MAKES A DIFFERENCE

Allows user to access more filtering material – extending cartridge life significantly, reducing breathing resistance and costs.

SAF-TWIST CARTRIDGE CONNECTING SYSTEM EXCLUSIVE TO COMFORT-AIR RESPIRATORS

POSITION 1

- Rotates the cartridges down and back.
- Provides the greatest downward vision available.
- Generally used when other PPE not required like faceshields and welding helmets.
- Ideal when working up close, in confined areas or when walking around an area.

POSITION 2

- Rotates the cartridge inward.
- Allows cartridge to fit under faceshields and welding helmets.

POSITION 3

- Rotates the cartridge inward and up.
- Provides additional clearance in the chin area.
- Allows cartridge to fit under faceshields and welding helmets.

P100 UNIQUE FILTERING SYSTEM

A unique, patented filtering system that offers the lowest profile & best economy. Unique Space Plenums (patented design) allows the filter to evenly "load" to the edge, resulting in longer life and lower breathing resistance.

The Diskit has incorporated a unique rugged frame design that will not crush or collapse. The frame also allows for easier handling & attaching to facepiece. ALLOWS USER TO ATTACH WHILE WEARING WORK GLOVES.

Low profile design & offset connector provides the best visibility available on a half mask respirator. Only 1/4" thick and weighs only .7 oz., allowing it to fit under any faceshield or welding helmet, improving wearer comfort.

Build the Diskit into a combination cartridge using the Diskit adapter. The Diskit combination system will reduce user costs significantly without compromising protection or performance.

**DO NOT use N Series products for protection against oil aerosols, such as grinding with oil based lubricants or processes with glycerin mists.

***When R Series products are exposed to oil, a one shift (8hour) time use limit applies.

*** Nuisance levels refer to concentrations that are less than the OSHA PEL or applicable governmental occupational exposure limits, whichever is lower. Do not use for respiratory protection against organic vapors.

Selection Guide*

N95 - Approved for minimum 95% efficient protection against certain non-oil particulates.
R95 - Approved for minimum 95% efficient protection against certain non-oil and oil particulates.
Typical applications: For welding on steel or aluminum, use an N95 pad and a Half-Mask respirator. Also used for woodworking or general dust environments, protection against sodium salts, aluminum oxides & silicates, carbon black, paper dusts, cotton dusts, fiberglass, gypsum, graphite and mineral or rock dusts. If oils are present, use the R95 filter.

Particulate
Filter Pads

For protection against organic vapors. Typical applications include protection against lacquer thinners, petroleum distillates, naphtha, acetone, isopropyl alcohol, toluene & stoddard solvent.

For protection against chlorine, hydrogen chloride, sulfur dioxide and chlorine dioxide. Typical applications include cleaning or etching (e.g. metal or concrete) with the acids listed. Also used for protection against muratic acid.

Gas/Vapor
Cartridges

For protection against ammonia or methyl amine.

For protection against organic vapors, chlorine, hydrogen chloride, sulfur dioxide and chlorine dioxide. Typical applications include anywhere there is a combination of acid gases and organic vapors. Some cleaning compounds contain both.

For protection against all of the gases and vapors listed above plus hydrogen fluoride, hydrogen sulfide and formaldehyde.

Select a filter pad, then select either the retainer or the optional cover to easily add particulate protection to any gas/vapor cartridge. In general, select an N95 pad for lower concentrations where a Half-Mask respirator will be used. If oils are present, use the R95 in place of the N95 filter. The retainer is an open top design to be used in heavy dust/mist applications; the optional cover is for general use. **Typical applications:** Protecting against misting or splashing of the liquid of the gas/vapor contaminants listed above. Also used where there is a combination of any of the particulate hazards listed in the first row and also any of the gas/vapors listed above.

Gas/Vapor/
Filter
Combination

Approved for organic vapors and minimum 95% efficient protection against certain non-oil particulates with the N95 filter. For oil based paints, lacquers and enamels, use the R95 filter. This combination is best suited for non-oil based painting applications and also most commercially available pesticides. If the pesticide contains oil, use the R95 filter. Also used for some concrete and floor sealers. **Advantages:** Unique filter design has low breathing resistance and resists clogging so you don't need a special pre-filter. **Note:** Not for use against paints containing isocyanates.

Organic
Vapor/N95
or R95

P100-Passes NIOSH's most rigorous testing criteria and is approved for minimum 99.97% efficient protection against oil & non-oil particulates. **Typical applications:** battery plants, nuclear power facilities, asbestos abatement (specific limitations apply see OSHA 1910.1001) and remediation, lead, cadmium, silver, cobalt fume & dust, radionuclides and radon daughters. Also used for dusts, fumes, & mists with a PEL less than 0.5mg per cubic meter. P100OV - NIOSH approved for certain oil & non-oil based particles. DENTEC recommended for relief against nuisance levels*** of organic vapors. DENTEC recommended for protection against ozone up to 10 times the OSHA PEL. Not NIOSH certified for use against ozone.

DISKIT
Particulate
Filter

Select the appropriate gas/vapor cartridge for your application and then select the Diskit filter that meets your particulate protection needs. The durable, reusable adapter allows you to easily replace the cartridge or filter when they expire. **Typical applications:** Plastics processing where there are vapors & glycerin mists. Can also be used for pesticides containing oil & for paint spray operations. Lacquer and enamel paints & non-oil pesticides.

Gas/Vapor/
Diskit
Combination

P-100 - Approved for minimum 99.97% efficient protection against oil & non-oil particulates. This low-profile filter passes NIOSH's most rigorous particulate test criteria. It is packaged in a sturdy molded housing, so there is no chance of filter damage. The low-profile P100 has been engineered to provide low breathing resistance & long life, at an economical price. The optional pre-filter is best used in heavy dust applications. It will extend the life of the P100 filter because it prevents larger particles from rapidly clogging the high efficiency media. **Typical applications:** Any application which required a 42CFR84 P100 filter such as lead, cadmium, asbestos (specific limitations apply, see OSHA 1910.1001), radionuclides and radon daughters.

Low Profile
P100 Filter

The sturdy, low profile P100 shown above is available permanently sealed to any Dentec Safety Specialists cartridge. This provides the ultimate protection & durability at a very affordable price. The optional pre-filter is best used in heavy dust applications. It will extend the life of the P100 filter because it prevents larger particles from rapidly clogging the high efficiency media. **Typical applications:** The Acid Gas/Organic Vapor/P100 is commonly used in metal smelting or forging, such as steel mills or mining and post mining operations. These filters are also used anywhere there is a combination of particulate & gas/vapor contaminants where the particulate hazard requires a P100 filter.

AD2N95A

AD2N95VA

AD2N95OVA

AD2 SERIES - N95/P95 CONE SHAPED

- Foam nose cushion and adjustable nose clip ensure a secure & comfortable fit.
- Non-Latex elastic straps do not require pre-stretching allowing for quick fitting, and reduces consumption costs.
- Straps are electro-sonically sealed to the facepiece. No staples provide additional comfort and straps are difficult to pull from the mask reducing consumption costs.
- Crushed resistant shell will not collapse in hot, humid conditions.
- Will maintain its shape without the need for a plastic mesh housing.
- An optional valve version provides enhanced breathing comfort.
- N95 version approved for minimum 95% efficient protection against certain non-oil particulate.
- AD2N95OVA offers a layer of activated carbon that filters out nuisance levels of organic vapors below PEL.
- P95 version 95% efficient protection against all particulate aerosols.
- AD2P95OV offers a layer of activated carbon that filters out nuisance level organic vapors below PEL / TLV.

AD2P95V

AD2P95OV

AD5N95

AD5N95V

AD5 SERIES - N95 CUP SHAPED FLATFOLD

- Same great features as the AD2N95 series
- PLUS**
- Individual adjustable aluminum nose clip provides an excellent fit and seal.
- Foam cushion and adjustable nose clip ensure a secure and comfortable fit.
- Reinforcing ribs provide additional shell strength reducing consumption.
- One way exhalation valve on side reduces effort to move hot air out of the mask.
- Top cover directs hot airflow downward, helps to reduce lens fogging.
- Cup shape flat fold design provides the best of both mask styles.
- Cup shape provides excellent fitting capabilities.
- Flat fold feature allows the user to store the mask comfortably in a pocket.

Individually
Packaged

Padded
Nose Bridge

AD4 SERIES - N95 FLATFOLD

- Flat-Fold N95 Disposable Respirator delivers maximum breathing comfort and fit.
- Horizontal fold allows the mask to move with the jaw helping to maintain a proper fit throughout the day.
- Easy donning with a single, continuous strap and no staples.
- The large cavity provides easier, cooler breathing and allows for uninhibited speech. An optional valve version provides enhanced breathing comfort.
- Packaged in convenient individually sealed bags to maintain product integrity and provide easy transport and storage. Fits easily in a coat pocket. The convenient dispenser box mounts on a shelf or wall, so you can put them out, right where they are needed most.

AD4N95

AD4N95V

COMFORT[®] EASE DISPOSABLE RESPIRATORS

80-9078-0

BARRIER STYLE FACE MASK –3 PLY EARLOOP NON MEDICAL GRADE- (NOT NIOSH APPROVED)

Ideal for social distancing. Protects various manufactured products from worker contamination. Adjustable nosepiece allows for quick and simply adjustment. Elastic earloopstrap provides excellent comfort. Anti-allergic materials -3 layer design.

15ND10

NUISANCE DUST MASK- (NOT NIOSH APPROVED)

Offers relief from non-toxic dusts and pollens only. The ND10 is unlike any other dust mask because of its unique design and features. It is lightweight, easy to breathe through, fits easily and comfortably, inexpensive and disposable. Less than 1/3 ounce and doesn't collapse when it becomes wet.

HYGIENIC WIPES

A safe and effective way to keep all of your Personal Protective Equipment clean. Safe and effective for cleaning respirators, hard hat suspensions, and other Personal Protective equipment. Also good for cleaning phones and keyboards.

79100 Respirator Wipe, alcohol free, case of 10 boxes; 100 per box.

79110 Respirator Wipe, contains 70% isopropyl alcohol, case of 10 boxes; 100 per box.

FIT TESTING ACCESSORIES

Plastic IAA, Bitrex or TSI Portacount test kits are available.

79200 Fit Test Kit, TSI Portacount, includes Adapter, Clips, Tubing, Suction Cups. (2) P100 Filters.

79210 Adapter Only, TSI Portacount.

79215 100 Suction Cups, 100 Clips, 50' of Tubing.

79260 Fit Test Kit, Bitrex, includes fit test hood, nebulizer #1, nebulizer #2, sensitivity solution, fit test solution, two sets of replacement nebulizer inserts.

79261 Replacement Fit Test bitrex ampules 2.5cc.

79262 Replacement Fit Test sensitivity ampules 2.5cc.

79263 Test hood.

79240 Fit Test Kit, IAA, includes Banana Oil, (2) OV Cartridges, Instructions.

79241 Replacement Banana Oil, (1) 3.5 oz. bottle.

706200 Qualitative Fit Test Ampules - Banana Oil (IAA) (box of 10).

***WARNINGS:**

1. Selection & typical applications shown are a guideline only. Prior to selecting a respirator, the workplace hazards must be evaluated by a qualified Industrial Hygienist, who will determine the appropriate cartridge, filter, and facepiece as well as use limitations.
2. Respirators must be selected, fitted, used and maintained in accordance with MSHA, OSHA and other applicable regulations as well as ANSI Z88.2.
3. Do not exceed maximum use concentrations as established by regulatory guidelines.
4. Never use a half-mask respirator where contaminant concentrations exceed 10 times the PEL or TLV.
5. Never use a full facepiece respirator where contaminant concentrations exceed 50 times the PEL or TLV.
6. Before using any respirator, READ and UNDERSTAND the instructions provided with the respirator facepiece assembly as well as the Cautions and Limitations listed on the enclosed NIOSH approval matrix.
7. Although this respirator reduces exposure to certain contaminants, it DOES NOT completely eliminate your exposure or risk. Misuse of this product or failure to follow the warnings may result in sickness or even death. For proper use, consult a qualified safety professional or call:

Dentec Safety Specialists, 1-888-533-6832.
