

**Dentec Safety Specialists**

# **IceTred™ Traction Devices**

**WALK OR RUN ON ICE OR SNOW WITH CONFIDENCE**

# PROTECT WITH DENTEC

## TOUGH & DURABLE DESIGN

Made of durable natural rubber that is incredibly tough but maintains its flexibility in extreme temperatures. Extra thick toe cap straps make it easy to fit all footwear styles.

## TINY SOLUTIONS BIG GRIP!

Strategically positioned tungsten carbide spikes provide excellent ice traction performance while maintaining comfort under foot. Wears longer and holds its ice piercing edge better than steel spikes or screw heads. Becomes sharper with greater wear. Spark resistant. Used on all ICETRED™ Traction Devices. Rubber Traction studs provide excellent traction on snow.

## NOT A SPARK HAZARD

Third party tested not to be a spark hazard in gas groups A – D as per CSA C22.2 No. 213-17 combustibility testing protocol. If you require intrinsic safety protection from static discharge, must use approved Electrostatic Discharging (ESD) footwear or clothing and/or accessories that offer ESD protection with our ICETRED™ traction devices.

→ According to the Canadian Institute of Health Information, there were 67,418 hospital emergency department visits in Canada due to unintentional falls on ice 2019.

→ Consider the magnitude of costs and losses that are created by injuries from accidental slips and falls. We all know that the expenses associated with injuries of this type extend far beyond medical treatment for both employee and company.

**Winter ICETRED™ Traction Devices offer a truly ECONOMICAL SOLUTION to a very real SAFETY concern.**

→ Winter ICETRED™ Traction Devices are lightweight and fit over the footwear people already own and feel comfortable in. Reduce risk falls caused by walking on icy surfaces or from using cumbersome traction aids and unfamiliar footwear.

# Heel Traction Devices

## 10705-HTD

### Adjustable & Easy to Use

Velcro strap allows the HTD to be easily secured to any footwear regardless of size. Unique heel pad shape forms more naturally to any footwear to ensure maximum spike contact.

### Universal Size

Unique rubber formulation provides more stretch to ensure a tight and secure fit to the footwear regardless of size or type

# Mid Sole Traction Devices

## 10704 MSTD

### High Visibility

Green elastic strap with retro reflective stripe to fit all footwear styles.

### Two Thicknesses

Available in two different thicknesses to fit footwear with non-defined heel or a defined heel.  
Patent Pending Design!

### Adjustable & Easy to Use

Quick adjustable elastic strap fits all footwear styles. MSTD Pad can be easily rotated to the top of the arch to remove the spike when moving to indoor surfaces to prevent damage or marking.

## 10704 MSTD NDH (Non Defined Heel)

# Full Sole Traction Devices

Available in 4 sizes

- 10710 S- FSTD
- 10710 M- FSTD Medium
- 10710 L- FSTD
- 10710 XL- FSTD Extra Large

### Easy to Use

Extra large heel tab makes it easy to pull the heel pad over any footwear.

Unique rubber formulation that will maintain its flexibility in temperatures -40 C & F.

Six strategically portioned spikes providing ultimate traction on flat and graded surfaces. Rubberized traction studs that provide excellent traction on snowy surfaces.
