Dentec's New

79300

Welding Adapter

Weld Smarter,
Breathe Easier

COMFORT[®]
AIR

Update Your Welding Safety & Efficiency

The Dentec 79300 Welding Adapter is designed to seamlessly integrate with the Comfort-Air[®] 130M air purifying full-face respirator. This innovative solution replaces the cumbersome welding shield and half-mask respirator combination, offering enhanced comfort and superior protection.

Quick & Easy Attachment

Attaches effortlessly to the Comfort-Air[®] series 130M respirator, ensuring a snug and secure fit for uninterrupted work.

Flip-Up Lens Housing

Features a convenient 2" x 4 1/4" lens housing that flips up for easy access without removing the respirator.

Universal Lens Compatibility

Accepts all brands of auto-darkening or standard welding lenses (sold separately), offering flexibility based on your needs.

Rugged Durability

Engineered for tough conditions, the robust design withstands the demands of industrial environments, providing long-lasting performance.

Combination P100 Cartridge Compatibility

Attach combination carbon P100 cartridges when necessary, a feature unavailable with traditional welding shields, to ensure ultimate respiratory protection.

Cost Effective

Offers an economical solution by eliminating the need for multiple separate pieces of equipment, saving you time and money.

PROTECT WITH DENTEC

130M SERIES FULL FACE MASK

79300 Welding Adapter

Step up your safety gear with the 130M Series Full Face Mask, engineered for superior protection and comfort in demanding environments. Made from high-quality special compressed silicone rubber, this mask ensures an incredibly comfortable fit, making extended wear easy and breathable.

Supreme Comfort

Made from special compression silicone, offering a comfortable and secure seal for all-day wear.

Anti-Fog Performance

The lens is treated inside and out with anti-fog technology, ensuring clear visibility in all conditions.

Innovative Nose Cup

Designed to reduce heat and CO2 buildup, keeping you cool and comfortable while maintaining a steady airflow.

Amplified Communication

A metal speech diaphragm enhances voice clarity, allowing for easy communication without removing the mask.

Hands-Free Convenience

The neck-strap allows the user to hang the mask securely around the neck during breaks.

Durable And Practical

Comes with a heavy-duty nylon carry and storage bag for added protection and convenience on the go.

Replaceable Parts

Engineered for longevity, the mask features replaceable parts, ensuring maximum value and extended product life.

Universal Fit

One size fits all, simplifying inventory and reducing the need for extensive fit testing.

Enhanced Protection

With an Assigned Protection Factor (APF) of 50, it offers five times the protection of traditional half masks (APF of 10).

SEAMLESS SAFETY. SUPERIOR WELDING

Dentec's NEW 79300 welding adapter is the perfect choice for welders seeking enhanced protection convenience, and compatibility in one rugged, high-performing unit.

130MLP0W

Includes 79300 Welding Adapter, 130M SC silicone mask with P100 cartridge.

(Does not include welding or cover lens)

130MLP00OVW

Includes 79300 Welding Adapter, 130M SC silicone mask, DISKIT® Pancake style P100OV filter that filters out nuisance level of organic vapors below the PEL and provides P100 level protection. SparkShield® protects the filter and the face mask from hot metal sparks.

(Does not include welding or cover lens)
